

Laser Scanning

Laser Scanning Benefits:

- CAD traceable .rcp or .e57 3D point clouds.
- Point cloud measurements accurate to 1/4" or better.
- Examining model slices and sections can reveal anomalies that are otherwise difficult to detect.
- Capturing 3D dimensional information of everything visible reduces the need for return trips.
- A reliable, efficient, affordable means to save time and control project costs.
- We have the equipment to reach just about anywhere. (No more ladders!)
